

## Infor VISUAL Product Configurator

The Infor VISUAL Product Configurator is a development tool for manufacturers of complex, highly configurable products with numerous standard and available options. It enables your sales force to correctly customize and configure your product, then quickly and easily create quotes and customer orders in Infor VISUAL Enterprise. Infor VISUAL Product Configurator is a sophisticated configurator and compatibility engine that handles all requests for changes to the base specification through an easy-to-use Windows interface. The end result is a product specification that has been fully checked for component compatibility and completeness.

The Product Configurator is rules-based and enables accurate point-of-sale customization, configuration, and pricing.

Infor VISUAL Product Configurator supports a Parametric Configurator, allowing for the setup and creation of Bills of Material and Engineering Masters based on user-defined criteria. The user can create a set of options and assign a series of complex formulas which, in turn, define the possibility of custom parts, configured and priced based on the customer's needs.

- Create engineering designs for complex engineer-to-order or configure-to-order products using rules-based parameters.
- Define engineering rules for including, excluding, and combining features.
- Define complex, user-defined formulas for weight, quantity, and length calculations.
- Configure your product's features and options dimensionally.
- Maintain product, data, and price information quickly and easily.
- Create a quote and Bill of Material automatically from an engineering design.
- Enter catalog numbers easily with Product Code Nomenclature.
- Integrate various toolkits for use within the Configurator.

Category	Sales Code	Description	STD	Price
Base Model	Ra1	20,000 Lb. Cap. Single Speed	STD	\$0.00
Chassis	Ra2	20,000 Lb. Cap. Two-Speed		\$1,400.00
Engine	Ra2	44,000 Lb. Cap. Tandem Single Speed		\$2,800.00
Transmission	Ra1	58,000 Lb. Cap. Tandem Single Speed		\$5,250.00
Front Axle				
Rear Axle				
Tire				
Wheel				

  

Selected Category	Sales Code	Option Description	Price (each)	Qty	Prep	STD
