An Innovative Solution for Smaller Manufacturers

Affordable, integrated, quick-to-install, easy-to-learn – exactly what smaller engineer-to-order and make-to-order manufacturers are looking for, and exactly what Infor VISUAL Jobshop has to offer. Infor VISUAL Jobshop includes integrated tools for quoting, order entry, inventory control, production, labor collection, shipping, and invoicing. It is an affordable system that offers do-it-yourself implementation, easy to learn Microsoft® Windows® features, and customizable reports to help manage all your operations and position your company for growth.

You need a software solution that fits the way you do business. A solution designed by people who understand the needs of small manufacturers; built by professionals that can address your needs, your business processes, and your operations. You need Infor VISUAL Jobshop.

We designed Infor VISUAL Jobshop Premier with continuous improvement in mind. It can help you improve workflow without having to spend money for unnecessary technology. Jobshop uses the same core technology as the Infor VISUAL Enterprise system. This allows companies to gain a competitive edge with a powerful solution now, while easily transitioning to a more comprehensive ERP and supply chain product in the future. Jobshop also integrates with common financial packages such as QuickBooks® and Peachtree® Accounting, giving you the power to address your accounting needs.

With its intuitive design, Infor VISUAL Jobshop Premier provides an advantage to smaller manufacturers by offering complete control over operations, eliminating redundant data entry, and ensuring consistency and accuracy across the shop floor.

Infor VISUAL Jobshop addresses the needs of small manufacturers with beneficial tools for managing operations and streamlining business processes.

Relational Database Technology

- Consolidate and centralize your vital business information.
- Establish operational consistency and standardize administrative processes within a highly flexible, functional framework.
- View up-to-the-minute information throughout your shop.

Quoting and Estimating

- Develop cost estimates quickly and accurately from scratch, established parts, or “the same thing only different” requirements.
- Account for supplier price breaks and your economies of scale automatically when developing quotes for multiple quantities.
- Mark-up your material, labor, burden, and service costs at their own rates.

Engineering Definition

- Define operational templates and combined bill of material and routing structures for parts produced.
- Use dimensional variable attributes to drastically reduce the amount of masters you need to maintain.

Sales Order Management

- Create a sales order from a quote, then generate an acknowledgment with a few clicks of the mouse.
- Accept and track orders for identical parts with multiple delivery dates.
- Create shop orders automatically from, and link them to, individual sales order lines.
- Ship or return orders with a click of your mouse.
- Generate pack lists automatically.
- Create invoices and optionally send them via e-mail to your customers.

Inventory Control

- Buy by the pound, stock by the length, issue by the foot, receive by the unit, and sell by the box with Jobshop's versatile units conversion functionality.
- Reduce multiple Stock IDs with dimensional tracking while ensuring you have enough inventory on hand to complete the job.
- Respond quickly to customer needs with Jobshop features that support, and easily recover from, “negative” inventory positions.
- Track material by Lot number or Serial number.

Shop Floor Control

- Generate work orders quickly that include complete work instructions, linked files, and pictures.
- Capture and analyze all labor, material, burden, and service costs charged against a job.
- View accurate job status with Infor VISUAL Jobshop's automated barcode labor data collection module.

“VISUAL Jobshop has changed the way we look at our business. The application is easy to implement and customize and has made impossible scheduling tasks possible. It has helped increase our throughput and improve our reliability to customers. If you don’t have these tools, you’re short-changing your company.”

—David Smith, President
Professional Components, Ltd.
Sidney, British Columbia

Planning, Scheduling, and Purchasing

- Manage your material requirements by the job, by stocking levels, or a combination of both.
- View requirements and purchase needed material from the vendor of your choice with the click of a button.
- Schedule orders individually or collectively to view the load on your shop.
- Generate schedules for your work centers.
- Receive to stock or directly to the job.

Accounting

- Track the actual cost of your material using multi-layer, FIFO (First In, First Out) costing.
- Export your financial transactions to your QuickBooks, Peachtree Accounting, or other financial application, or simply e-mail them to your accountant.

Help, Training, and Support

- Includes context sensitive ‘F1’ help and online books.
- Includes a comprehensive Getting Started Guide and computer-based demonstrations to facilitate implementation and learning.
- Call-in help and on-going, tiered support plans available.

Training and Implementation Support

Every package of Infor VISUAL Jobshop Premier Edition includes a Getting Started Wizard, context-sensitive help, online guides, screen cam demonstrations, and a printed Getting Started guide. Infor also offers Web-based training and has a Web-based knowledge center.

Infor has a growing number of Authorized Infor VISUAL Jobshop Resellers for your assistance to ensure you receive quality technical support. We also offer on-going Getting Started courses at our Hampton, New Hampshire office. You can receive discounts on courses when you enroll in software maintenance. Your local reseller may offer additional on-site training and implementation assistance.

For new customers in the United States and Canada, you can take advantage of free call-in, fax, and e-mail support for a 60-day period after purchase.

Maintenance and On-Going Support

Pay-As-You-Go Support

This call-in package offers your company easy access to expert telephone support.

Software Maintenance

You may choose to purchase software maintenance, which includes future version upgrades during your period of enrollment. You can also contact your local reseller for available support offerings.

Premium Support Package

The Premium package includes software maintenance and unlimited calls, faxes, and e-mail support.

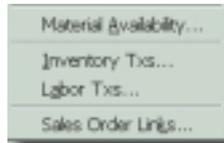

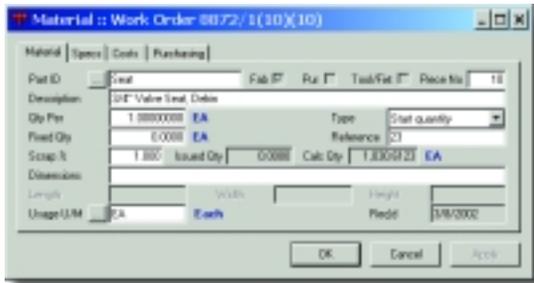

SHOP FLOOR CONTROL

Integrated, real-time information and rich functionality from Infor VISUAL Jobshop Premier makes it easy for you to manage shop floor operations, review critical reports, and improve productivity.

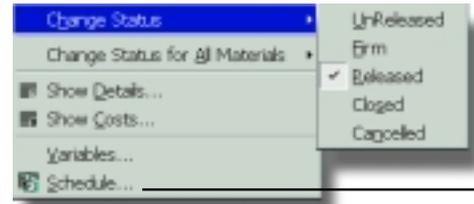

"We've been able to take on more work with the same number of people. Infor VISUAL Jobshop has helped us streamline order processing."

—Wayne Perez, President
Mirofine Company
Gardena, California

Click on any of the red cards to view detailed information about the components of your work order.

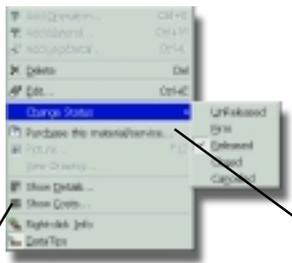

Access data quickly about material, inventory, labor, and sales orders.

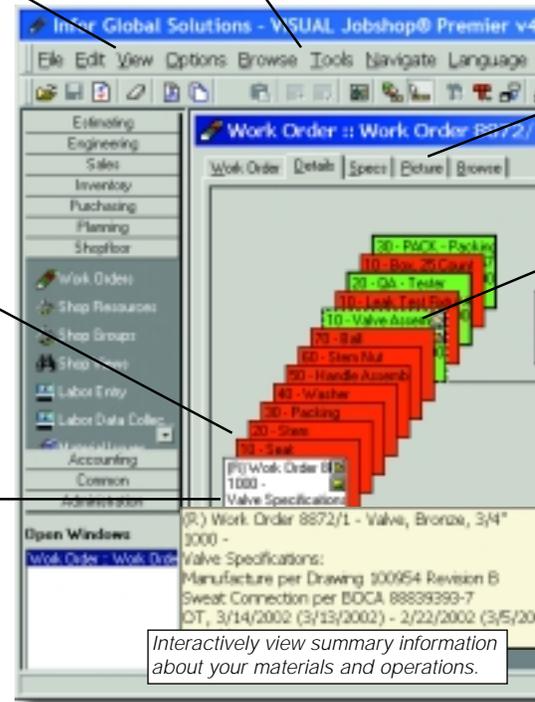

Schedule work orders directly from the Tools menu.

Right click on any card to edit details, change the status, and access summarized information about your operations.

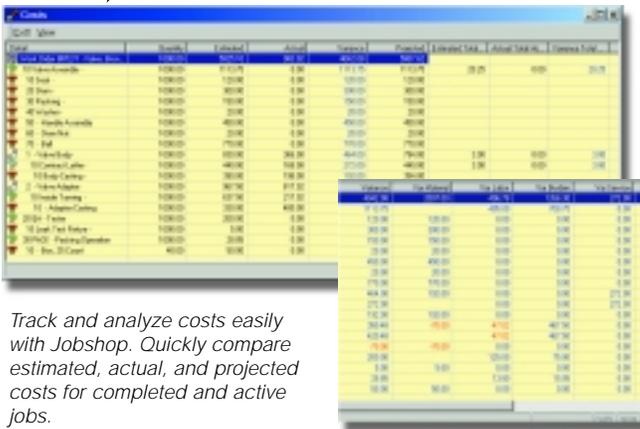

Create and view "combined" bill of material and routing structures using drag-and-drop technology.

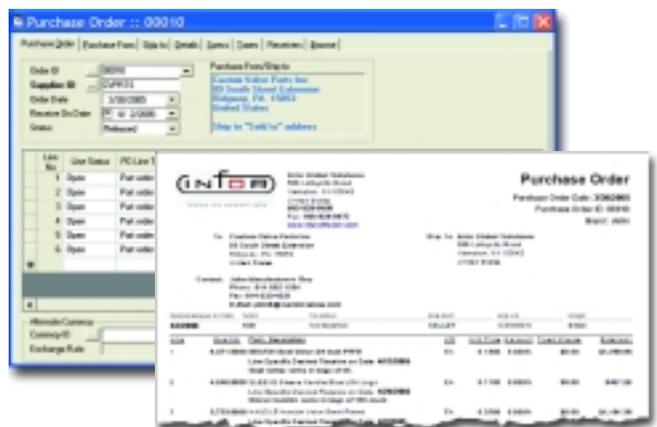

Interactively view summary information about your materials and operations.

Save time by purchasing materials and printing orders directly from the Manufacturing Window.

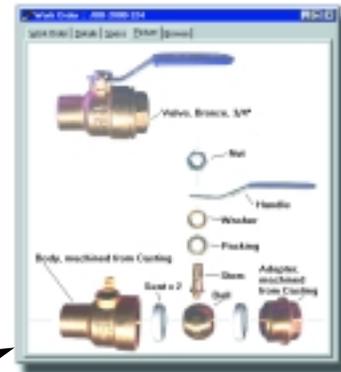

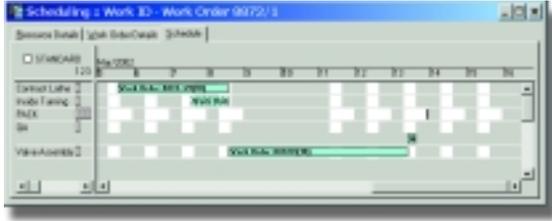

Track and analyze costs easily with Jobshop. Quickly compare estimated, actual, and projected costs for completed and active jobs.

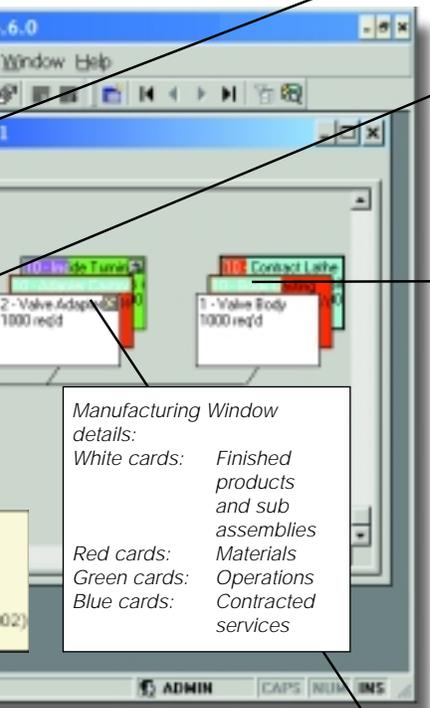

Click on any column to see more specific information.

Immediate access to accurate data provides a competitive advantage in today's marketplace, allowing you to make knowledgeable decisions and increase profits.

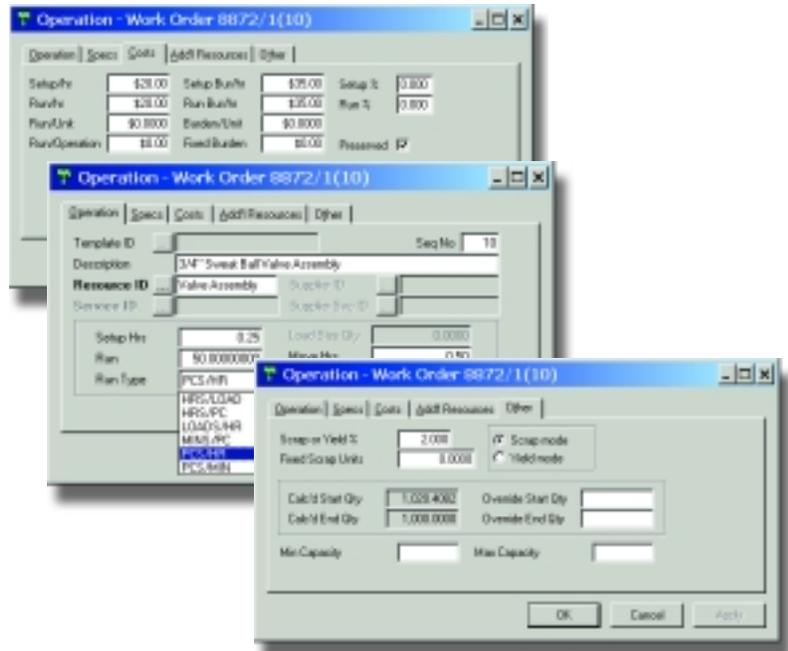

Attach pictures, view specifications, and track the origin of costs quickly and accurately.

Drill down from any operation card to access information about costs, timing, and scrap rates.

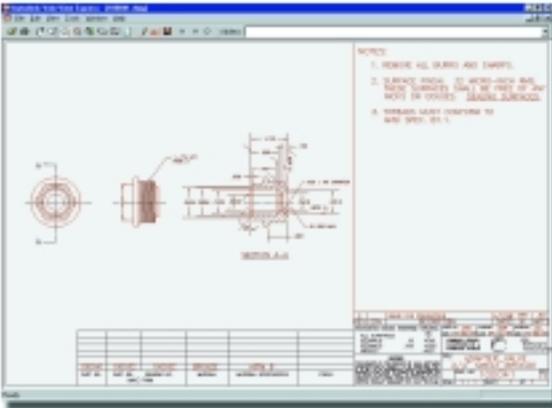

View the percentage of completion of any job instantly using the graphical bars.

Manufacturing Window details:
 White cards: Finished products and sub assemblies
 Red cards: Materials
 Green cards: Operations
 Blue cards: Contracted services

With Infor VISUAL Jobshop Premier's state-of-the-art Manufacturing Window®, you can view every angle of your production activity, from sales order release to work order closing.

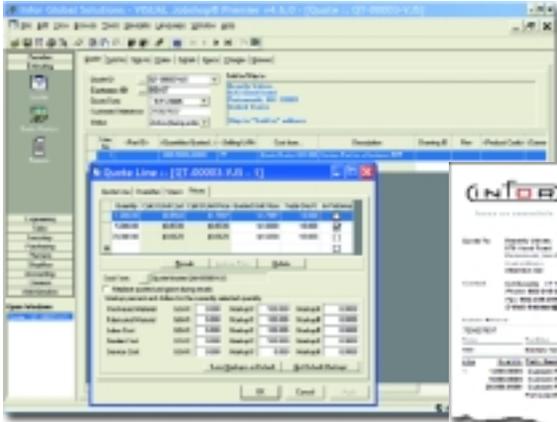

Click the icon to view any file that has an associated application.

"What attracted us to Infor VISUAL Jobshop was its scalability. We wanted a system to manage our materials that would grow with us. We couldn't spend a lot of money, but we wanted to be affiliated with a software vendor that had expertise in the manufacturing field."

—Jon Young, Vice President
 Vforge, Inc
 Denver, Colorado

ORDER PROCESSING

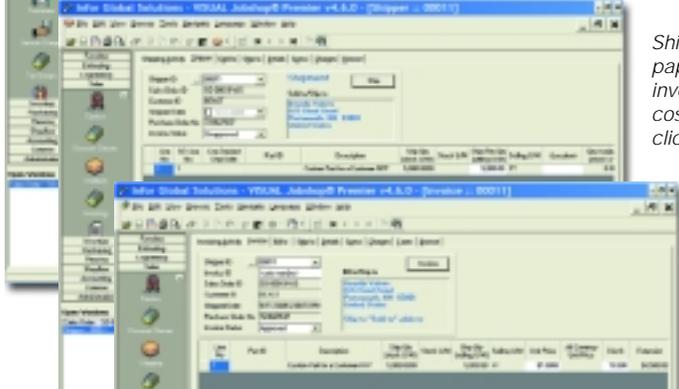

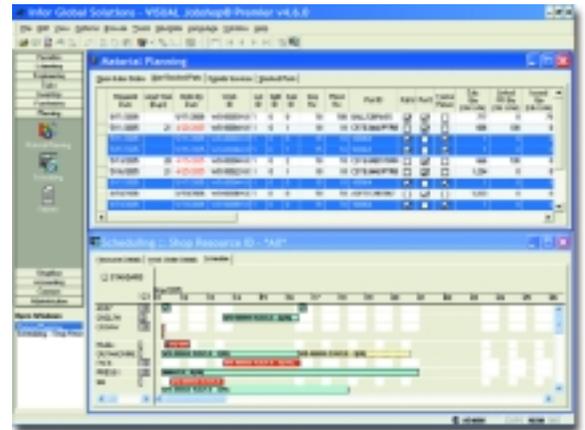

Develop accurate quotes, copy those quotes into orders, and instantly create shop orders complete with work instructions for employees.

Infor VISUAL Jobshop Premier Edition streamlines workflow and eliminates the need for redundant data entry by integrating quoting, order entry, inventory control, production, shipping, and invoicing.

Automatically account for supplier price breaks when developing quotes for multiple quantities.

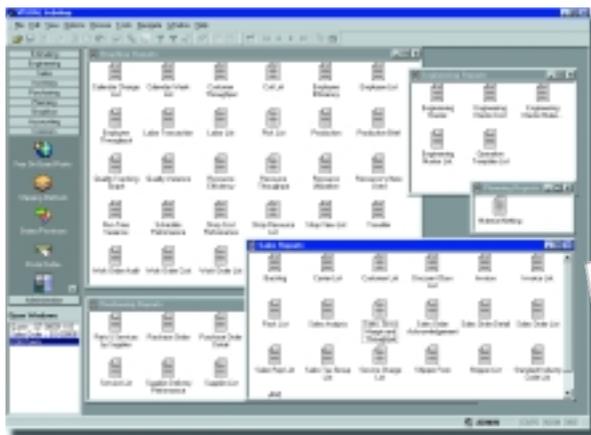

Ship, invoice, generate paperwork, relieve inventory, and track costs—all with a few clicks of the mouse.

Right-click and procure materials effortlessly from Jobshop's versatile material planning screens.

Scheduling is a standard feature with Infor VISUAL Jobshop Premier.

Continuously improve your company's performance and review sales, profitability, and throughput with Infor VISUAL Jobshop Premier's extensive reporting capability.

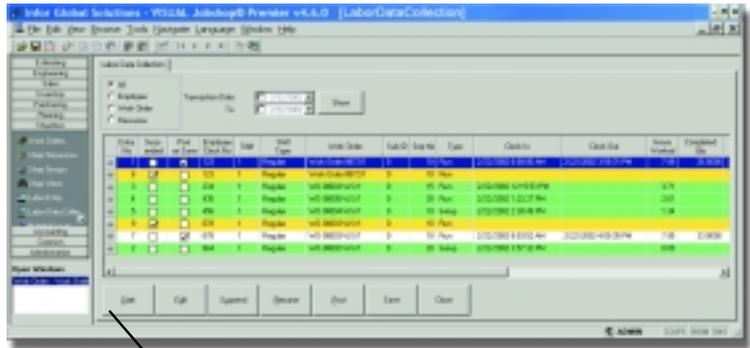

Conduct, measure, and manage your business for success with more than 100 reports. Customize Infor VISUAL Jobshop Premier's existing reports or write your own with any ODBC compliant report writer such as Microsoft Access or Crystal Reports.

AUTOMATED LABOR TRACKING

The standard Labor Data Collection module and optional Labor Data Collection Wizard allow your company to better manage its employees and precisely monitor labor hours expended against work orders. You can implement Labor Data Collection through an integrated module and extend its reach by installing an optional stand-alone executable on networked computers.

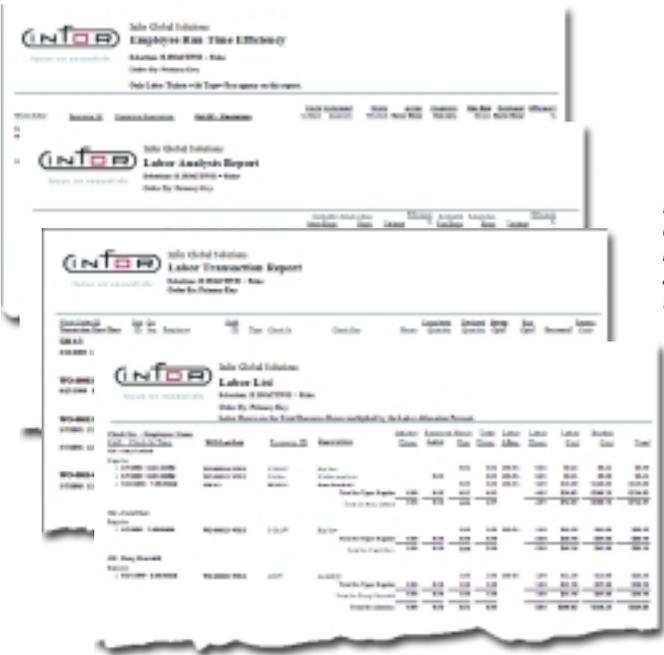

Monitor shop floor status from the Labor Data Collection module Supervisory Window.

Access job status information easily and view linked operation application files with the touch screen compatible layout of the Labor Entry Details Window.

Print barcode-enabled reports, including labor lists and employee run time efficiency.

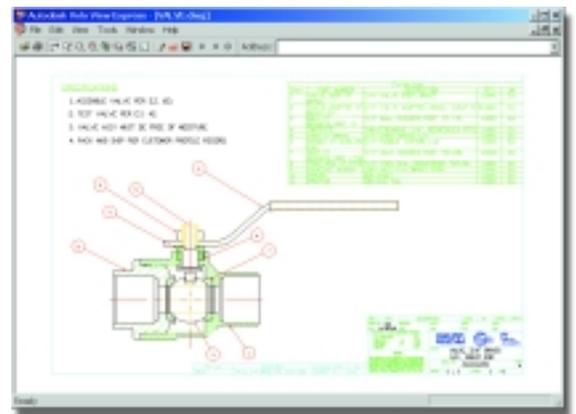

Click or touch the screen to quickly reference associated specifications and drawings for work orders.

Track labor and overhead cost more accurately than ever before using automated labor data collection.

Collect real-time labor data using optional barcode scanners.

"Jobshop offers many features that rival larger MRP systems, which works perfectly for us. We see Infor VISUAL Jobshop as the right product for building and growing our company. Infor has been incredibly responsive towards our progress and success. The support has been first rate."

—Jerry Peterson, Vice President
GP2 Technologies, Inc.
Bow, New Hampshire
